<u>1-2. Trends of Financial Indices in Recent Years</u>

<u>1–3. History of Management Plans</u>

		Subjects	Remarks
Nov.1982	Emergency Plan for Strengthening	1st theme: profitability improvement plan	Radical improvement in operational structure was targetted,
-	the Corporate Foundation	2nd theme: efforts to modernize and increase the efficiency of operational systems	feared continued simultaneous slump in three sales division and yen rising.
Aug.1983	("K" Plan) First Stage	3rd theme: a cost-cutting campaign carried out with the participation of all personnel	
	Emergency Plan for Strengthening	Reconstruction of system to implement "K"plan, mainly for above 2nd theme	(Reference-in June 1983, the Head Office was relocated to current location)
		Promotion of office automation, Improvement in business procedure, Cost reduction etc	(Herefelde in suite 1965, die Head office was refocated to current focation)
- Man 1094		Toniolon of office automation, improvement in business procedure, Cost reduction etc	
	("K" Plan) Second Stage		
Apr.1984		1) Emergency Measures (disposal of uneconomical ships, establishment land-based and marine personnel plan.)	Aimed to establish the capability to resume dividend payment.
	Improvement Plan	2) Reinforcement of operational capabilities (development of an internationally competitive fleet,	
	(A part of this plan was named	Enhancement of cost control, Promotion of new business)	(However, Plaza Accord in 1985 drastically rose yen to 150 yen per one U.S. dollar,
-		3) Augmentaton of financial measures	and the U.S. Shipping Act of 1984 made container freight fall significantly.
		4) Modernization and increasing the efficiency of operational organization (streamlining of land-based	Our losses were expanded.)
			Our losses were expanded.)
M 1007		operations, reorganization and utilization of an information systems)	
Mar.1987		5)Promotion of safe vessel navigation and cost reduction	
Apr.1987	Emergency Ratiolization Plan	1) Disposal of uneconomical ships	
		2) Make the organization more efficient and streamlined. (inc. spinning off our subsidiaries)	
		3) Slashing of both of land and sea workforth with intoroduction of a special retirement policy.	Almost all targets completed on schedule.
-		<"Emergenvy Employment Measures" (agreed with All Japan Seamen's Union)	
		4) Improvement and reinforcement of operational capabilities	=>Once Operating Income moved into the black F88.
			-/once operating income moved into the black 188.
		5) Measures against stronger yen	
Aar.1989		6) Implemantation of measures for cost reduction.	
	While we did not have specific managen	nent plan during this period, there was a campaign for imporoving customer satisfaction (named 'One for All, All fo	r One', April 1990 - March 1994), and
	"Project 20 20", an internal campaign in	Containership division around 1991 (targeting at total USD 40 min. profit rise through revenue up by 20 mil. and c	ost down by 20 mil.), etc.
Dec.1992	Target-10	- Reexamining costs and expenses from every angle	
- Around			
	"K"Line Reengineering Program	- Strenghtening international competitiveness through cost-saving and shift as many jobs as possible to overseas	
001.1995			
	(K.R. Program)	- Establishment of structrure to respond customers' needs and to ensure stable profit even if faced with	
Mar.1996		exchangerate rate 100 yen per one U.S. dollar,.	
Apr.1996	K.R.Phase II	- Realization of the situation to implement continual payment of dividends	Unfinished targets in K.R. Program. From non-consolidation to consolidation. Aiming for competetiveness matching
-		- Reconstruction of operation on a consolidated basis by the entire "K"Line group	shipping companies in developing Asia. =>In F97 dividend paid after 15 year absense
Mar.1998			
	New"K"Line Spirit for 21(New K-21)	- Standing firm in our basic policy of pursuit of profitability while trying to expand scale of business, and	Aiming to make containership division move into the black, which was not achieved in K.R.PhaseII.
Apr.1770		continuing stable payment of dividends	
	*In '00, raised the numerical targets		Positive management plan for the first time in many years.
-	*Completed a year ahead of	- To expand shipping-based logistics business globally with customer-oriented attitude, and to aim at a corporate	=>Most targets achieved, though 9.11changed conditions at all.
Mar.2002	schedule as most targets achieved	group which is soild, and fully commited to challenge with courage.	
Apr.2002	KV-Plan	1. Further enhancing of Company's overall organization through cost reductions and profitable use of IT, etc.	Reconstruction of containership business-"Cost Slash 300"
1		2. Reinforcement of globalization firmly based on regional communities and pursuit of business synergy among business sectors.	(Total 30 bln. yen cost reduction plan: 15 bln. is from deployment of larger ships)
		 Initiate stronger efforts to implement logistics business. 	In F03 (ends Mar. '04) most of final targets inc. numerical ones were atatined a year ahead of schedule.
-			
		4. Persuit of technical innovations in marine transport, perfection of safety in navigation and cargo operations,	=>"K"Line Vision 2008
	*Completed a year ahead of	and further contribution to environmental preservation.	
Mar.2004	schedule as most targets achieved	5. Strengthening of corporate governance aiming at more transparency and greater effectiveness in management.	
Apr.2004	"K"LINE Vision 2008	1.Ensuring a stable profitability structure through reinforcing our business base	Set a vision for F08, to regard the period from now to F09, our 90th anniversary, as a runway.
· -	-Sustainable Growth and Establish-	2. Creation of a high-level, refined and more matured culture of the "K" Line Group with materialization of	As profit targets, set F04, 05 estimation & F08 vision
	ment of a Stable Profitability Structure-	dreams and upgrading of the "K" Line Brand	Fulfilled most final numerical goals in F05/fuel price hike=>2008+
1 2006	(Completed as most targets achieved)	3.Reinforcement of corporate governance and response to risk management	i united most mai functical goals in 105/1401 prec mice=220001
Apr.2006	"K"LINE Vision 2008 ⁺	-Measures to support systematic expansion of business scale (new target)	F06 targets NOT achieved due to container freight drop
-	-Sustainable Growth and Establish-	- Response to changes in business enviroments (new target)	F07 resuts exceeded most targets for F08 in the plan due to dry bulk market hike and
	ment of a Stable Profitability Structure-		containership freigt restoration, & conditions change => "K"Line Vision 100
Mar.2008	(Completed as most targets achieved)		
	"K"Line Vision 100	1. Activities to promote environmental protection	
-p1.2000	Themes: Synergy for All	2. Stable safety ship operation administration structure	The plan based on what we will be like in 2019 when we celebrate our 100th anniversary.
			The plan based on what we will be like in 2017 when we celebrate our room aninversary.
Man 2012			
Mar.2012		3. Borderless management through the best and strongest organization

7. New Businesses

As production at existing oil fields approaches its peak, it is inevitable to develop undeveloped oil and gas fields in ultra-deep waters and remote areas to respond to steady energy demand. Demand for advanced drillships and offshore support vessels used at those areas has rapidly increased. Notably, Brazil has succeeded in resource development in the pre-salt Santos Basin and is actively investing in development. Anticipating this change in the business environment, in the Group's medium-term management plan that began in fiscal 2008,

"K" Line set forth a policy of expanding the scope of energy resource development business beyond conventional marine transport such as oil and gas tankers by developing new businesses in the upstream sector, such as offshore support vessels, drillships and LNG FPSO.

The "K" Line Group will establish a business model that will make possible participation in wideranging transport operations from upstream to downstream in offshore energy resource businesses and development of a stable earnings base by further increasing synergy between energy resource transportation services, heavy lifter vessel services and offshore support vessel services

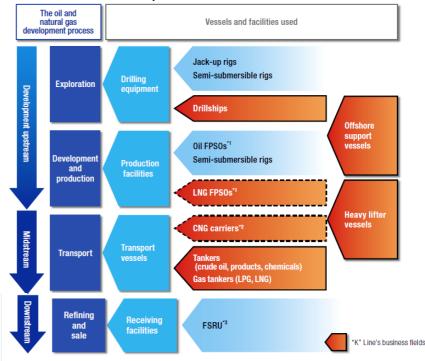

From Midstream to Upstream

Drill Ship (1 ordered + projects developing)

CNG Carrier (under development)

*1 FPSO: Floating Production Storage and Offloading System

*3 FSRU: Floating Storage and Regasification Unit

^{*2} CNG tanker: compressed natural gas tanker

①Heavy Lifter Business

Loading operation of large

reactor for oil refinery

Project cargo: Assembled module of LNG plant

Project cargo: Wind energy components

Business Environment

We anticipate firm cargo movements as a result of movement of infrastructure-related cargo, centered on the Middle East and Australia, as well as active investment in offshore oil and gas field development and wind power generation systems in response to persistently high crude oil prices.

Business Histroy

"K" Line re-entered heavy lift transportation business via its European subsidiary company possesses 50% share of SAL Group in 2007, headquartered in Germany, and aquired balanced 50% at the end of June 2011 which means "K" Line became 100% owner of SAL Group. We developed the heavy lifter services as a core business.

Operating Fleet

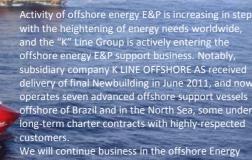

The SAL Group operates a fleet of 16 heavy lifters with lifting capacity ranging from 600 to 2,000 tons. The SVENJA and LONE, two heavy lifters owned by the SAL Group equipped with cranes with the world's highest lifting capacity of 2,000 tons, equipped with the Dynamic Positioning System (DPS), will meet needs for the transport of oil and gas development facilities and offshore-related facilities, which require advanced transport techniques.

SAL's Global Network

SAL has business sites around the world and aims to engage in business development utilizing selling capabilities underpinned by SAL's advanced maritime technical capabilities and knowledge and "K" Line's global network.

2Offshore Support Vessel Business

E&P support business sector, a growth market, and seek to win new business.

Anchor Handling Tug Supply(AHTS) vessels

AHTSs engage in support activities when offshore drilling rigs are moved from location to location, such as raising anchors from the seabed, rig towing. AHTS also engages in support activities for seabed pipeline laying works.

Our AHTSs, with length 95 meter and width 24 meter, have propeller output of 34,000 horsepower and one of the world's biggest bollard pull power (towing power) of 390 tons. They are equipped with all the latest equipment and systems, including a dynamic positioning system (DPS) for maintaining the vessel in a fixed position using its propulsion system, remotely operated vehicles (ROV) for monitoring undersea work for use in the installation, repair and maintenance of subsea equipment etc.

● Platform Supply Vessel (PSV) PSVs are "sea trucks" used mainly to transport materials and fuel to offshore rigs. The company's new PSVs, with length 95 meter and width 20 meter, are among the world's largest, with deadweight capacity of 5,100 tons and deck area of 1,100 square meters. Those vessels also have latest equipment and systems such as DPS.

Business Environment

With the heightening of energy needs world wide, development of undeveloped oil and gas fields in ultra-deep waters is being more active. Demand for offshore support vessels has rapidly increased in all over the world, notably in Brazil which is actively investing large amount in development.

Business History

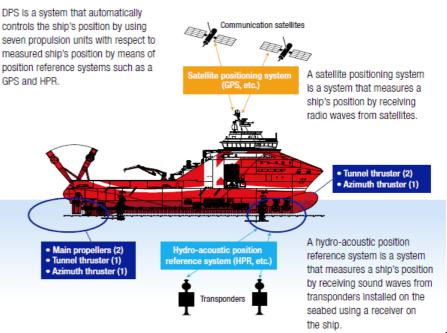

In 2007, "K" Line established K LINE OFFSHORE AS, an offshore support vessel operator headquartered in Norway, and began vessel operation in the North Sea in 2008.

Fleet and Medium-Long term Contracts

The company has a fleet of seven vessels, 2 AHTS and 5 PSV, all of which are now in operation. With regard to PSV, the company concluded a contract for two PSVs with Petrobras, the Brazilian state-owned energy company and entered into a contract for two large PSVs with the UK subsidiary of major US energy company ConocoPhillips.

Other 2 AHTS and 1 PSV were under spot operation but recently the company suceeded to make medium-term charter contract with STAT OIL who is the largest player in North Sea.

Dynamic Positioning System (DPS)

7. New Businesses <7−2. New Business Expansion>

3LNG FPSO Projects

"K" Line supports FLEX LNG Ltd.'s floating LNG producer projects as the company's largest shareholder and strategic partner.

④ Drillship Business

Business Environment

As a clean energy, global demand for LNG is expected grow, and expactations for LNG producer to provide a solution for developing small and medium-size gas fields remote from consuming areas are raised.

Business Strategy

FLEX LNG, a company in which "K" Line is the largest shareholder, is involved in a number of developing projects. One example is the InterOil-controlled Papua New Guinea project which is working to liquefy natural gas from gas fields by using a floating LNG producer. Other than FLEX LNG, Shell's Prelude FLNG Project is going at off the coasts of Western Australia.

MV"ETESCO TAKATSUGU J"

•Ultra-Deepwater Drillship Now in Operation in Petrobras Pre-Salt Oil Field off Brazil

Named "Etesco Takatsugu J," the drillship is the most advanced of its type in the world and was constructed at Samsung Heavy Industries Co., Ltd. of South Korea in 2011. It is capable of drilling in water depths of 10,000 feet (3,000 meters) and down to 30,000 feet (9,000 meters) below the seabed. This ship has been under charter to Petrobras since April 2012.The first well will be drilled in the Franco SW block in water approximately 2,000 meters deep about 200 kilometers off Rio de Janeiro. The area is located in pre-salt fields in which Petrobras holds an interest.

The drillship is owned by Etesco Drilling Services, LLC, a company that was established in the United States with the four Japanese companies(*4J) holding equity stakes totaling over 85 percent. (*4J = Nippon Yusen Kabushiki Kaisha , Mitsui & Co., Ltd., Kawasaki Kisen Kaisha, Ltd. , and Japan Drilling Co., Ltd.)

In recent years, there have been numerous discoveries of large oil and gas fields in presalt areas in Brazilian coastal waters, and there is worldwide interest in these massive deposits. The region concerned is believed to have the potential for further development and is a priority area for Petrobras. Through this business, the four Japanese companies will contribute to exploration for oil and gas in the promising fields.

9. Panama Canal Expansion Program

The Panama Canal

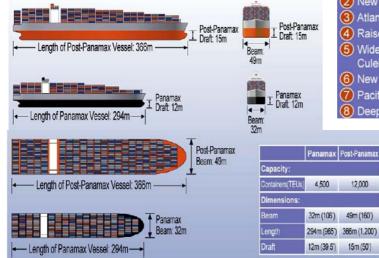

The Panama Canal is approximately 80 kilometers long between the Atlantic and Pacific Oceans and the Canal is composed of three locks and lakes.

The Canal today has two lock lanes. The plan consists of adding a third lane with large locks including dredging etc, in order to make it possible for large containership more than 12,000 TEU size to transit the canal. It is scheduled to be completed during end 2014 - 2015.

Maximum ship which can pass current canal (Panamax) Beam: 32.2m LOA: 294.1m Draft: 12.0m

Maximum ship after completion of third lane. (present plan) Beam: 49m LOA: 366m Draft: 15m

(see drawing below)

- A Raise the maximum Gatun lake operating water level
- 5 Widening and deepening of the navigational channel of the Gatun lake and the Culebra Cut
- 6 New approach channel for the Pacific Post-Panamax locks

12,000

Pacific Post-Panamax locks with 3 water saving basins per lock chamber

8 Deepening and widening of the Pacific entrance channel

★ How much is the Panama Transit Fee? ★

 \Rightarrow it varies so much by ship type and size,

- In case of Laden Dry Bulk ship(Panamax)
 - \Rightarrow About \$ 140,000/per transit (as of July 2012)

⇒For further information, please check website of The Panama Canal Authority (ACP) http://www.pancanal.com/eng/expansion/index.html

New Atlantic Locks to be located at east current GatunLocks

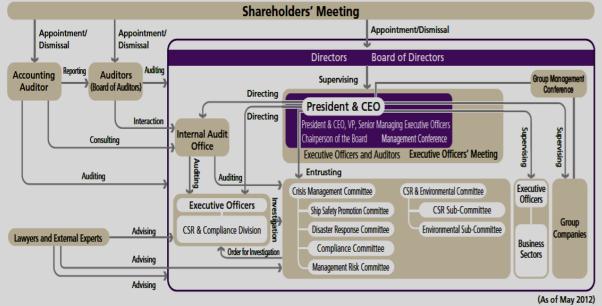

the Pacific New Pacific Locks to be located at south west current Miraflores Locks

Chart: "K"Line Corporate Governance System

Corporate Governance Structure

Structure of Our Business Operation, Management Monitoring, and Internal Control

///Promotion of Compliance///

©Group-wide efforts for developing a compliance system

 We have installed a Compliance Committee chaired by the president that discusses strategies and countermeasures to ensure compliance is maintained throughout the entire Group.
 We have also installed a dedicated division (CSR & Compliance Division) to enhance awareness on compliance to executives and regular employees through training courses and other activities.

Ocompliance Month

•To increase the thoroughness of our Group's compliance even further, we began designating a Compliance Month, starting in FY2011. During this month, we carry out various awareness-raising activities such as holding seminars for the management of our company and Group companies and sending notices out to Group companies.

Spreading awareness about the UK Bribery Act throughout

the Group in Japan and overseas.We also provided training courses on competition laws, including the Antimonopoly Act of Japan and the European Union Competition Law.

©Response by the Compliance Committee

If an alleged compliance violation has occurred, the issue is referred to the company's Compliance Committee which sets out the procedures to be followed, the Compliance Committee conducts an investigation and then issues instructions to correct or cease the violation. If the issue concerns "K" Line, the Executive Officer in charge of personnel affairs will propose any disciplinary action to be taken under the working regulations. Under the "Rules on Operation of Compliance Committee," the Compliance Committee is obliged to keep strictly confidential the names of whistle-blowers and the details of deliberations including the name, departments, or any other information that would permit identification of the persons involved in the matter, and permits them to consult with attorneys.

OInvestigating awareness of the Hot Line System

•We have introduced a whistle-blowing system called the "Hot Line System." In addition to an internal contact, we have also appointed lawyers as external contacts.

OInitiatives for protecting personal information

•We have developed a set of privacy policies and a personal information management code. We also undertake related training and education to further refine our system for protecting personal information.

<Structure of Business Operation> Striving to improve corporate value under a governance structure

We apply the Executive Officer System, under which we streamline our management through the transfer of authority and prompt decision-making. Board of Directors

The Board of Directors meets at least once every month. At the Board, our Directors make decisions on basic management policies, matters stipulated by laws and regulations, and other significant management issues. They also supervise the performance of duties by Executive Officers and our staff members. Of the 13 Directors, two are Outside Directors stipulated by the Companies Act of Japan.

Executive Officers' Meeting

This Meeting is held twice a month, in principle, and is attended by Executive Officers and Auditors. Participants help the President to make decisions through frank discussions, in addition to sharing information and ensuring compliance.

Auditors / Board of Auditors

Three of the five Auditors are Outside Auditors specified in the Companies Act of Japan. The audit policy, audit plans, and other related matters are determined by the Board of Auditors, aiming for a fast, functional auditing process. Among other activities, auditors attend meetings of the Board of Directors and other important meetings and inspect documents showing final decisions, auditing the work of Directors as an independent organization. We also appoint dedicated staff to assist auditors.

Management Conference

The Management Conference holds discussions and exchanges opinions every week, in principle, and is attended mainly by Senior Managing Executive Officers and higher-level Executive Officers. Depending on the agendum, others may be invited to the Conference.

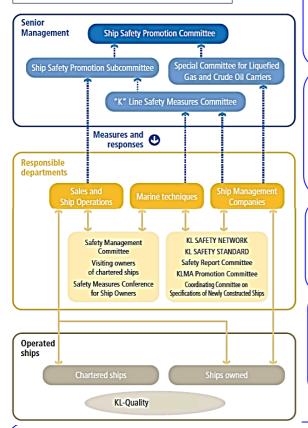

Safety Operation - The Key Element of a Shipping Business.

Establishing and maintaining safety in navigation and cargo operations, environmental preservation, and economically efficient operations are the permanent missions of the "K" Line Group in its shipping business. Above all, safe navigation and cargo operations are the foundation of our business. For this reason, we are committed to building a secure system for establishing and maintaining this foundation.

In "K" LINE Vision 100, the medium-term management plan we developed in April 2008, we once again defined that a secure system for managing safety in navigation and cargo operations is at the core of all of our business activities. We subsequently reviewed the medium-term management plan and adopted "K" LINE Vision 100 Bridge to the Future in April 2012, in reviewing the Plan, we reconfirmed that establishing a system for safe navigation and cargo operations, with the continuous effort to environment preservation, was an absolutely critical and inalterable requirement.

"K" Line Group's System for Safety Management

← Provision of opinions ← Interactive communication

Ship Safety as the Pillar of Management

The Ship Safety Promotion Committee embodies the comprehensive and systematic measures we take to ensure safety in navigation and cargo operations. It was established in 1983 as an internal committee, and its activities later encompassed Group companies responsible for ship management. The main tasks of this Committee, which meets every quarter, include aggregating defect reports during the period under review, analyzing their causes, and developing necessary responses. In addition, the Committee acts on all safety-related matters from every possible viewpoint, such as responding to international treaties, sharing new technical information, and recently considering measures against piracy in the Gulf of Aden, etc.

Supporting People's Lives and Industrial Activities

Among the many modes of transport, ocean transport plays an important role in international trade, as it ensures the economical transportation of large volumes of freight for long distances. In Japan's foreign trades, for example, ocean transport is used for as much as 99.7% of all cargo in weight basis., which include sources of energy such as crude oil, LPG, LNG, and coal, raw materials including iron ore, gypsum, feed, and grain, and consumables such as automobiles and home electric appliances. Ocean transport is an extremely important part of the logistics infrastructure to carry these essential goods for people's lives and industrial activities. Activities for maintaining safe navigation and cargo operations are designed to deliver cargo that we are entrusted safely and reliably to customers as well as to ensure the safety of crew members and ships. These activities are also essential for maintaining the international logistics infrastructure, and so constitute part of our social responsibility. We never forget this fact in our daily work.

Safety Management System (SMS)

SMS is a system required by law. It is aimed at securing safe systems and environments for work during ship operations, establishing preventive measures for all predictable dangers, and continuously improving the safety management skills of both shore staff and crew members, including skills in preparing for emergencies related to safety and environmental preservation. At the "K" Line Group, we not only comply with the provisions of SMS, but also make additional efforts based on our own standard to establish a system for managing safety in navigation and cargo operations.

Emergency Response Drills: Always Ready for Emergencies

What should our Company or employees do if a ship has been involved in a collision and fuel oil is spilling, for example? We have set out the actions we need to take in such an emergency in our Emergency Response Manual. Based on this manual, we regularly conduct emergency response drills to maintain and improve the response capabilities of staff members and departments. We conducted our latest drill in February 2012 by assuming a large-scale oil spill and confirmed the functions of the manual. We also discussed issues on the application of the manual at a meeting after the drill so that we could refine it. The Emergency Response Manual contains the know-how we have accumulated through drills, and we are tackling further safe operation of ships each day to ensure that we never have to actually use the manual.

\prime Efforts for Eradicating Piracy: Resolutions and Measures Taken by the Global Community

Education and Training Programs: "K" Line Maritime Academy (KLMA)

The KLMA is the aggregate of training facilities in Japan and overseas, providing educational, training, and development programs including crew training programs and career path programs. We train crew members to operate ships managed by the "K" Line Group based on the "KLMA Master Plan," a plan designed to pass on to the next generation the "K" Line Group's maritime technologies accumulated over many years since our establishment. In this way, we strive to build an awareness of our safety standards, safety in navigation and cargo operations, and environmental preservation, improve our maritime technologies, and pass them on to future generations.

In recent years, heavily armed pirates have appeared off the coast of Somalia and in the Gulf of Aden, vital link between Europe and Asia, and further in the Arabian Sea, the waters which link the Persian Gulf and Asia. In response, the United Nations Security Council passed a resolution that called for uncompromising action against this turpitude, and the International Maritime Organization has also passed a resolution requesting for nations to take necessary measures to eliminate piracy. Based on these resolutions, international naval forces, including Allied Powers in Europe, navies of other nations, and the Japan Maritime Self–Defense Force (MSDF), have begun to provide escort for ships passing through the area. Marine Safety Officers of Japan Coast Guard with police authority are onboard the MSDF escort ship to enforce laws against illegal action by the pirates. In principle, we operate under the security provided by these forces. We have also developed guidelines for sailing near Somalia and in the Arabian Sea to ensure the safety of our ships. If we should encounter pirates, we take evasive actions following Best Management Practice in anti–piracy measures.

10-3. Environment Preservation

The seas are the stage where our industry comes into play. It brings various benefits to humanity with ships that are an energy-efficient and eco-friendly mode of transportation. We are required to defend the earth, to make best use of its limited resources and to promote recycling.

Respecting and defending humanity's beautiful and rich homeland is a social responsibility businesses must fulfill and also is an important homework assigned to us who are living in the 21st century.

"K" LINE and its entire Group have long been tackling environmental preservation/protection issues simultaneously with our pursuit of perfection in safe navigation and cargo operations. We established "K" LINE Group's Environmental Policy in order to further assure that all people within and outside the Group are well aware of how we are poised to effectively focus on environmental matters.

"K" LINE Group's Environmental Policy

As a global logistics business group centering on maritime transportation, we consider that it is an integral management assignment of eternal importance to address the issue of preservation of the earthly environment. We recognize in a proper manner that those exhaust emissions and wastes created by consumption of power sources necessitated directly and indirectly by business activities in the logistics industry can result in an increasingly heavy burden on the limited amount of resources of both our earthly and marine environment. We also recognize the importance of prevention of marine pollution caused by marine accidents. In order to contribute to society in general through our diligent and consistent efforts for preservation of the earthly environment, we, everyone throughout the entire "K" LINE Group, hereby commit ourselves that we will personally, fairly and severely observe environment–related treaties/conventions and rules/regulations, and make utmost efforts to eliminate and minimize any adverse environmental impact.

(Behavioral directions)

1. In carrying out business activities

 \cdot We will seek for perfection in safety of navigation and cargo operations in order to preemptively prevent the spillage of fuel, cargo oil and/or any other hazardous substances from ships during operation or at the time of any marine accident.

 \cdot We will properly manage exhausts and wastes deriving from both ship and shore operations. We will thereby try to exert our utmost efforts to the recycling of any such items.

· Through an upgrade in ship operation and work performance, we will encourage maximum conservation of energy and resources.

2. On development and introduction of environmental technology

• For the purpose of reduction in exhaust emissions which cause air pollution and global warming to be incurred, we are committed to the study and improvement of ship and shore facilities and fuel oil, and to the development and introduction of the most sophisticated equipment and related technology.

• We will refrain from using ship hull paints containing substances hazardous to marine life and also from using any ozone-depleting substances.

3. For the purpose of encouragement of environmental preservation

• We will implement restructuring of organizations with greater emphasis on studying/educating/training about safe navigation and environmental affairs.

 \cdot We will elevate awareness and understanding of all prevailing environmental issues among each member of the entire "K" LINE Group.

 \cdot We will practice information disclosure appropriately in relationship to the environment.

 \cdot The "K" LINE Group will support and participate in social activities contributing and dedicated to present and future preservation of our earthly environment.

In October 2001, we structured and commenced operation of "K" LINE's own Environmental Management System (EMS), and were awarded ISO14001 Certification for our EMS by Nippon Kaiji Kyokai (ClassNK) on February 26, 2002. Our EMS embraces the entire scope of marine transportation services in all "K" LINE sectors and branches in Japan as well as three ship management companies ("K" Line Ship Management Co., Ltd., Taiyo Nippon Kisen Co., Ltd. and Escobal Japan Ltd.) KLine (Japan) Ltd., Kawasaki Kinkai Kisen Kaisha, Ltd., Nitto Total Logistics Ltd. (Terminal Dept.) are involved in the program. (Present certification is valid until Feb.25, 2014).

As EMS encompasses all marine transportation services, its importance is directed to not only ship management itself but also ship operations and deployment planning. In cooperation with each group company concerned, "K" LINE is tackling all environmental issues covering marine transportation business from the widest possible perspective.

From 2004, we started publishing our own "Social & Environmental Report" that contains information about Corporate Social Responsibility. (till 2003 "Environmental Report" only.) If you are further interested in how we are tackling environmental preservation, we invite you to look through it. "Social & Environmental Report" may also be accessed on our website.

A DARA DA RADIO DA ANTINA DA ANTINA

Established in May 2001

10-4. "K"Line's Gas-Fuelled Ship Development Project

"K" Line Commitment

"K" Line's Gas-Fuelled Ship Development Project

Energy consumption is increasing rapidly due to the growth of global population, and the increasing exhaust gas emissions are causing global warming. Moreover, this is causing a price increase for bunker fuel oil which is becoming a serious problem in the marine shipping industry. In order to overcome these issues, "K" Line started research and development on Gas-fuelled ships, making it the first car carrier in the world to use liquefied natural gas (LNG) for propulsion.

Presently, propulsion of most ships is powered with heavy fuel oil or diesel oil. However, if there is a switch to LNG fuel, which is called a next-generation clean energy source for ships, pollutants in emissions such as carbon dioxide (CO₂), nitrogen oxides (NOX), sulfur oxides (SOX) and particulate matter (PM) can be drastically reduced. "K" Line has been a pioneer in the maritime shipping industry and is now tackling the challenges of developing LNG fuel technology.

*Compared to the use of heavy fuel oil, by switching to LNG and adopting new technologies, CO_2 emissions can be reduced by approximately 40%, NOx by 80% to 90%, SOx and PM by 100%.

LNG Tanks

Two pressure vessels (type C, 6 bar) are applied for LNG fuel tanks. These tanks shall be required to comply with strict safety standards. Therefore, the tanks are installed in an independent compartment and located a certain distance from the ship's outer shell and bottom to ensure safety in the event of a collision or other mure incident. In addition, a complete double-wall piping system is applied for fuel pipes as a further safety measure.

Gas Engines

Two sets of gas engines (5,000kw each) are applied as propulsion system, employing lean burn combustion. Each cylinder has an auxiliary chamber with spark plug to generate a flame for ignition, which is called torch jet, with the air-gas tuel mixture being combusted in the main chamber.

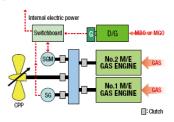

Propulsion System

Output of the two gas engines is combined by a special reduction gear and transmitted to one controllable pitch propeller (CPP).

Shaft Generators

Two sets of shaft generators are installed and driven by the reduction gear. It is possible to disengage the gear using a clutch. During navigation, all electric power demand can be covered by one shaft generator. During maneuvering conditions, parallel running of the two shaft generators is required to supply enough power to bow thrusters and other equipment.

System Structure

Challenges Faced by the Gas-Fuelled Ship Development Project Team

There are some difficulties to successfully realize this project. LNG fuel bunkering, storing and handling technology to provide LNG to Gas engines must be developed. Gas-fuelled ships engaged in ocean transport have never been built, except for LNG carriers and small domestic ships in Norway.

To solve these above-mentioned difficulties, "K" Line established the Gas-Fuelled Ship Development Project Team in 2010. It was started together with Kawasaki Heavy Industries, Ltd. which has the technologies of LNG carriers and gas engines as well as Det Norske Veritas (DNV), a Norwegian classification society that is famed as a pioneer in the use of LNG as ship fuel in Europe.

We intend to develop next-generation and environmentally-friendly technologies, exerting continuous effort to achieve the construction and operation of gas-fuelled ships in the near future.

LNG as a next-generation, clean energy: Meeting the Earth's needs for environmentally-friendly clean energy, Meeting the world's needs for environmentally-friendly ships, and Powering "K" Line's clean energy ships. Line of Presidents in $\ensuremath{^{\prime\prime}}\ensuremath{\mathsf{K}}\xspace^{\prime\prime}\ensuremath{\mathsf{Line}}\xspace$ and Brief History

10-8. Corporate Principles, Charter of Conduct, etc.

"K" LINE established its Corporate Principles and Vision, which promises the formation of a stable business base for the "K"LINE Group, in the management plan that was initiated from April 2004.

Corporate Principles of the "K"LINE Group

The basic principles of the "K" LINE Group as a shipping business organization centering on shipping lie in:

- a.) Diligent efforts for safety in navigation and cargo operations as well as for environmental preservation:
- b.) Sincere response to customer needs by making every possible effort; and
- c.) Contributing to the world's economic growth and stability through continual upgrading of service quality.

Vision

- 1 To be trusted and supported by customers in all corners of the world while being able to continue to grow globally with sustainability,
- 2 To build a business base that will be capable of responding to any and all changes in business circumstances, and to continually pursue and practice innovation for survival in the global market,
- 3 To create and provide a workplace where each and every employee can have hopes and aspirations for the future, and can express creativity and display a challenging spirit.

Charter of Conduct : "K" Line Group Companies

Kawasaki Kisen Kaisha, Ltd. and it's group companies (hereinafter "K" Line Group) reemphasize that due respect for human rights and compliance with applicable laws, ordinances, rules are the fundamental foundations for corporate activities and that group companies' growth must be in harmony with society and therefore we herein declare to abide by "Charter of Conduct" spelled out below:

1 Human Rights

The "K" Line Group will consistently respect human rights and well consider personality, individuality and diversity of its corporate members and improve work safety and conditions to offer them comfort and affluence.

2 Compliance to the Principles of Corporate Ethics

The "K" Line Group promises to comply with applicable laws, ordinances, rules and spirit of the international community and conduct its corporate activities through fair, transparent and free competition.

3. Trustworthy Company Group

"K" Line Group continues to pay special attention to safety in navigation, achieving customer satisfaction and garnering trust from the community by providing safe and beneficial services

4. Environmental Efforts

The "K" Line Group recognize that global environmental efforts are a key issue for all of humanity and that they are essential both in business activities and existence of the company and therefore we are committed to a coluntary and proactive approach to such issues to protect and preserve the environment.

5 Disclosure of Corporate Information and Communication with Society

The "K" Line Group will protect personal information, properly manage corporate information and disclose corporate information timely and appropriately, widely promoting bidirectional communication with society including shareholders.

6 Contribution to Society

The "K" Line Group as a Good Corporate Citizen will make ongoing efforts to contribute to social development and improvement and support employee's voluntary participation in such activities.

7. Harmony in the International Society

The "K" Line Group will contribute to development of international society in pursuance of its business pertaining to international logistics and related businesses, respecting each country's culture and customs.

8. Confront Anti-social Forces

The "K" Line Group will resolutely confront anti-social forces or organizations which may threaten social order and public safety.

The management of each "K" Line Group Company recognizes that it is their role to realize the spirit of the Charter and to set the pace that is to be followed by every employee in their company as well as by business partners. In the event of any incidents in breach of this Charter, the management of the respective "K" Line Group member company will demonstrate

decisiveness to resolve the problem(s), conduct a thorough investigation to determine the cause and to take preventative measures. Additionally, such management will expeditiously and accurately release information and fulfill their accountability to society.

This Charter of Conduct is accompanied by "Implementation Guidance for Charter of Conduct", which we have posted in our HP. (⇒http://www.kline.co.jp/en/csr/group/charter.html)

Tonnage Tax, Change in Circumstances for Japanese Vessels and Japanese Seafarers

1. Basic Act on Ocean Policy (Enacted April 20, 2007, Effective July 20, 2007)

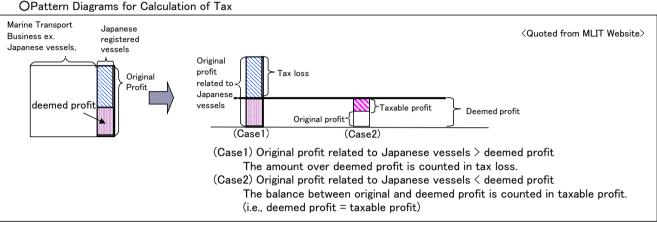

This act includes 'Securing Maritime Transport', which is :

2. Revised Marine Transportation Law for Tonnage Tax System

(Enacted May 30, 2008, Effective July 17, 2008)

-Japanese ocean-going shippping companies that are approved by the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) can select taxation on deemed profit instead of normal corporate tax for earnings connected to Japanese-registered vessels.

-Japanese tonnage tax system applies to Japanese flag vessels and offers a choice between the system and existing tax system. Once one of the two is chosen, we cannot change for 5 financial years starting on or after the date of MLIT's acceptance.

-In case Japanese oceangoing shipping companies choose tonnage tax system, they must receive approval from MLIT for their plans to secure Japanese registered vessels and to secure and foster Japanese seafarers as set forth in the basic policy issued by MLIT.

-Major standards for approval:

1 more than double the number of Japanese registered vessels within 5 years

②train more than one Japanese seafarer per each Japanese registered vessel annually

(training to acquire License for the 3rd Grade Maritime Officer)

3 deploy 4 Japanese seafarers per each Japanese registered vessel

-The special rule application requires such collaterals for suitable plans, (as, recommendations, revocation of approval, etc. in case of insufficiency,), and expansion of navigation order system to the area of international marine transporation.

3. First Approval of Plans to Secure Japanese Registered Vessels and Japanese Seafarers Concerning Tonnage Tax

-As for applications for approval of plans to secure Japanese registered vessels and Japanese seafarers required under the tonnage tax system, after review by MLIT, all 11 business operators that applied, as listed below including ourselves, met the criteria and were approved by MLIT.

• [Business Operators (Alphabetical Order)] Asahi Shipping Co., Ltd., Asahi Tanker Co., Ltd., Daiichi Chuo Kisen Kaisha, Iino Kaiun Kaisha, Ltd., Kawasaki Kisen Kaisha, Ltd., Mitsui O.S.K. Lines, Ltd., Nippon Steel Shipping Co., Ltd., Nippon Yusen Kabushiki Kaisha, Nissho Shipping Co., Ltd., The Sanko Steamship Co., Ltd., Shinwa Kaiun Kaisha, Ltd.

[Outline of the Plan by above 11 Operators]

0	Duration of the Plan : 5 years	(April 1, 2009 -	March 31, 2014)
---	--------------------------------	------------------	-----------------

- O Ocean-going Ships Planned to be Secured by all 11 Operators : 77.4 => 161.8 (approx. 2.1 times)
- O Japanese Ocean-going Seafarers Planned to be Trained by all 11 Operators : 698 for 5 years
- O Japanese Ocean-going Seafarers Planned to be Secured by all 11 Operators : 1,072 => 1,162 (+90, approx. 1.1 times)

FY2012 Tax Reform (Main Points) Ministry of Finance 10 December 2011 Tonnage tax system will be enhanced in the FY2013 tax reform on the premise of the amendment of the Act on Maritime

12. IR Policy

Kawasaki Kisen Kaisha, Ltd. ("K" Line) conducts its investor relations based on the fundamental direction outlined below, in order that a clear understanding and fair evaluation of our company can be made by all of our stakeholders, including shareholders and investors.

1. Fundamental Stance on IR Activities

"K" Line's fundamental approach to IR activities is the timely and appropriate disclosure of important facts concerning the company to all existing and potential shareholders and investors, in an accurate and clear, impartial and swift manner, with the aim of establishing a relationship of trust through accurate information disclosure.

2. Information Disclosure Standards

"K" Line discloses information in accordance with applicable laws and regulations such as the Financial Instruments and Exchange Act and the Timely Disclosure Rules set by the Tokyo Stock Exchange (TSE). We proactively disclose information that is deemed to be beneficial for the investment decisions of shareholders and investors, even where it does not fall under the Timely Disclosure Rules.

3. Information Disclosure Procedures

For information that falls under the Timely Disclosure Rules or which could have a material influence on the investment decisions of shareholders and investors, "K" Line complies with Timely Disclosure Rules by disclosing information through the TSE's Timely Disclosure Network (TDnet). The information disclosed at TDnet is also posted on our website as quickly as possible. We disclose all other information as well by postings on our IR website, press releases, etc.

4. Enhancing Communication

"K" Line seeks to enhance interactive communication with our shareholders and investors through briefing sessions and answering daily inquiries, etc. In order to gain further understanding of our company, we also try to enhance availability of IR information through our website, etc.

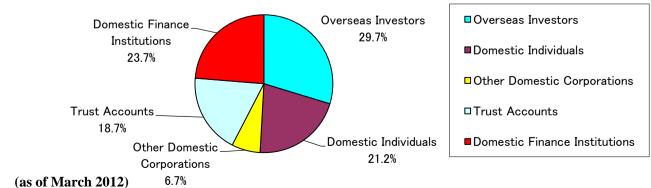

5. Notes for Future Prospects

The information transmitted by us as IR news may include information about future forecasts, plans and strategy, etc. That information is based on our future prospects and may include risk factors and elements of uncertainty. For further information, please refer to <u>Business Risks</u> for details.

6. Quiet Period

To prevent the leakage of material information of the company and ensure fairness, "K" Line has established the period about 2 weeks before the day of the announcement each quarter as a Quiet Period. During this period, the company refrains from answering questions and will not respond to inquiries concerning, or comment on, its earnings results, for which we sincerely request your understanding and acceptance.

13. Shareholder Composition
